InfoCom Research, Inc.

Creating Agile Organization to Cope Fast Changing ICT Market and Rising Social Economic Issues

InfoCom Research, Inc. is pleased to announce the new business units as a result of organizational changes, which take effect from April 27, 2015.

1. Back Ground

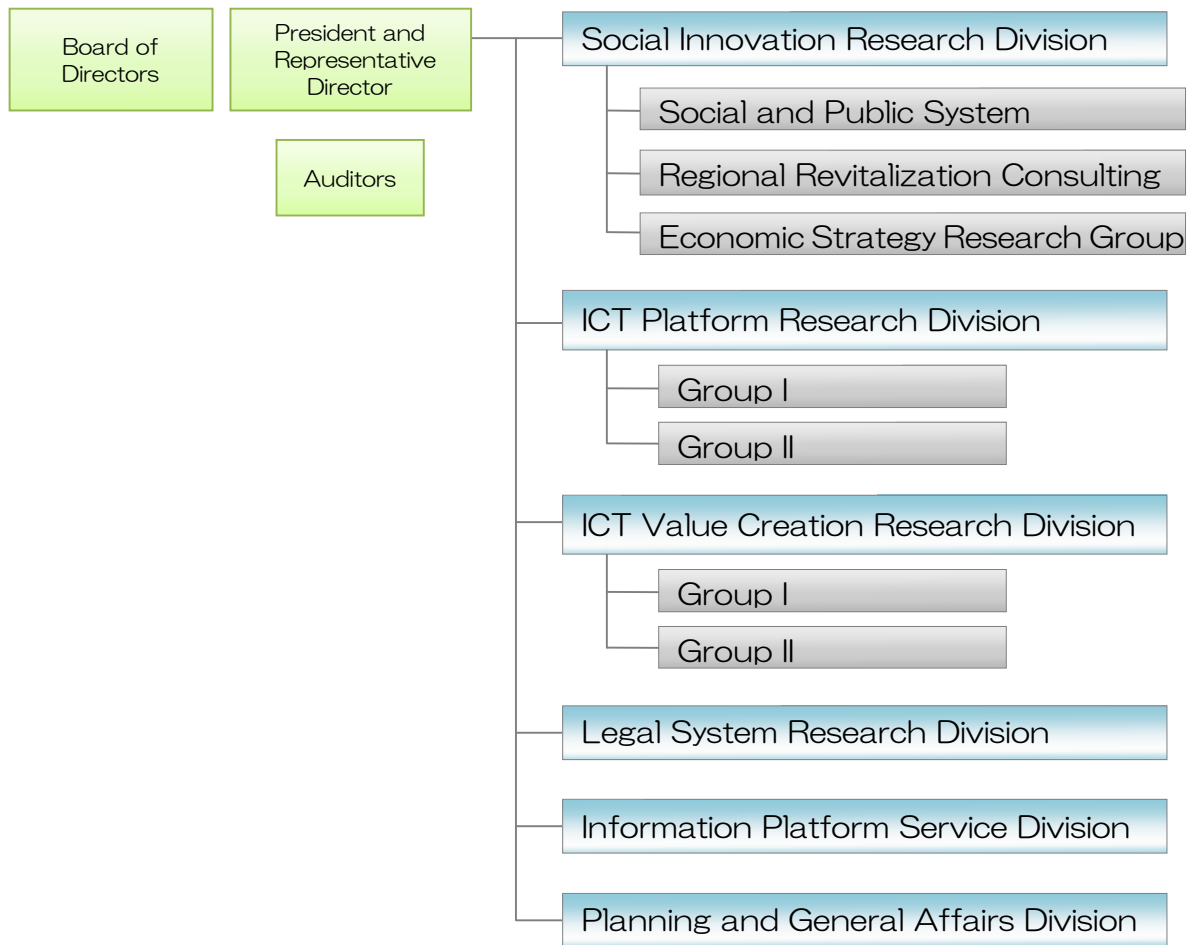

Globally, Info-Communications-Technology (ICT) market is evolving rapidly with the dawn of IoT (Internet-of-Things) era. In the new era, Info-Communications technologies and services are not closed to Smart Phones and PCs, however, integrated to non-ICT industries; such as automobile industries, housing industries and home appliance industries. With the power of ICT, IoT era will bring competition between various industries around the world. Japanese ICT market no exception to this tide of IoT era.

With the bright future lies ahead, Japan is also facing social-economic challenges such as economic decline in rural area and aging population. Use of ICT is one of the solutions that could effectively meet these challenges.

InfoCom Research Inc. is approaching its 30th anniversary. Since 1985, As ICT research firm, we have been adapting to the rapid change of ICT market. In order to serve our current and future client, InfoCom Research Inc. is creating new business units to meet the global demand.
